

Grenzenlose Wissensweitergabe

**Was an Slides-Software nervt und wie man
Präsentationen zurechtbiegt**

MRMCD 2026 · joliyea

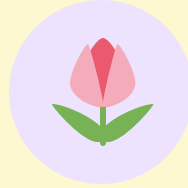

Mein Problem (vermute ich):

Ich will alles.

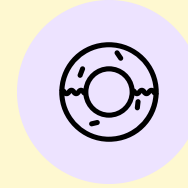

Gleichzeitig.

Es soll funktional sein.

Es soll schön sein.

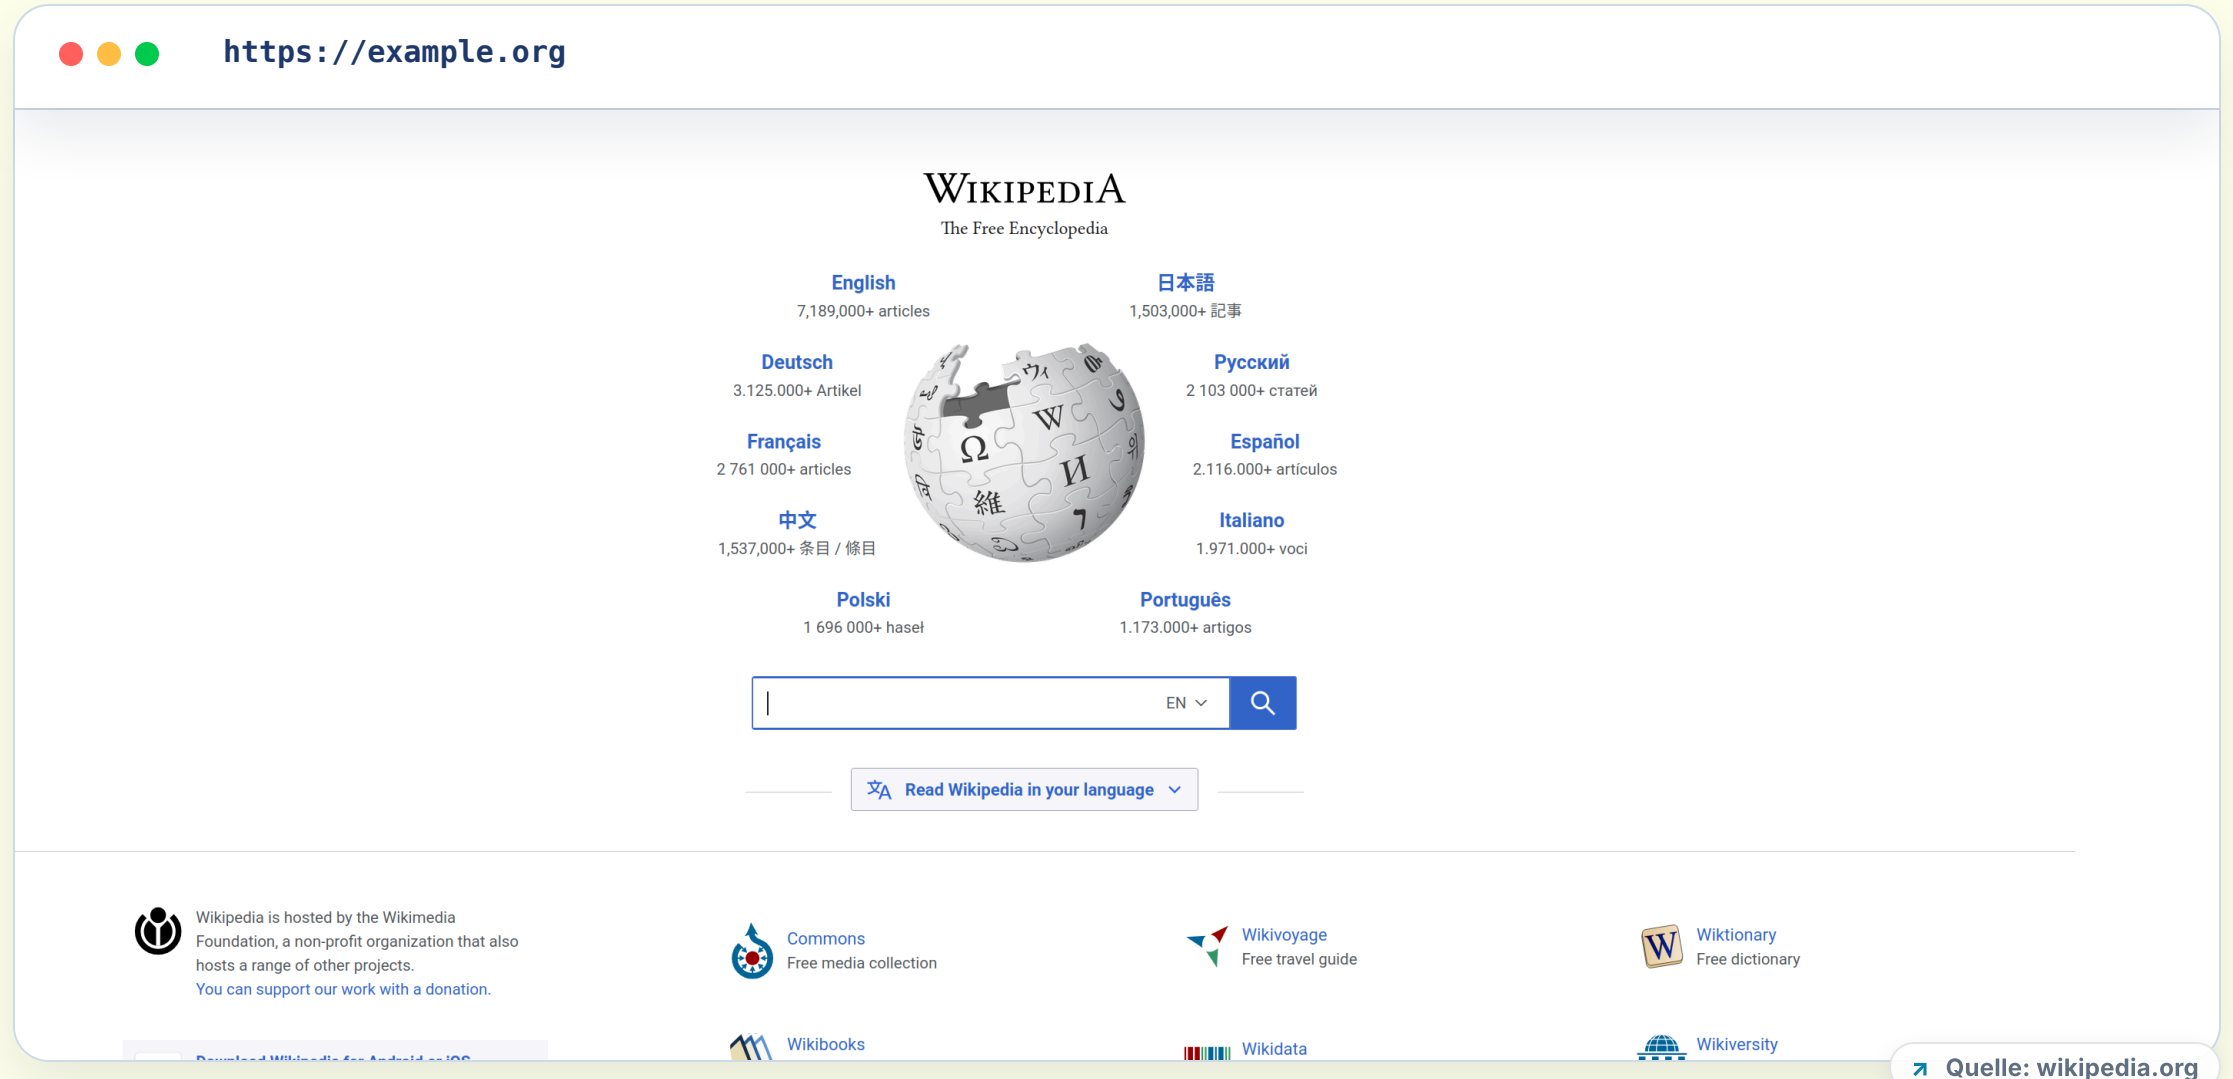

Es soll langfristig sein.

1. "Funktional"

- Input: **Markdown (.md)** → damit schnell durchsuchbar und anpassbar
- Versionskontrolle: gut für **git**
- Output: **Slides + Handout**, Speaker-Notes brauche ich nur eingeschränkt
- Komfortable Arbeit mit **Code, Highlights, Screenshots und Quellenangaben**
- **"fragmented"** → Elemente tauchen nacheinander auf

Zum Beispiel: Screenshot + URL

Quelle: wikipedia.org

Zum Beispiel: Viele Items als Spalten

Gegen ermüdende Listen, für grafische Säulen

1

Erster Punkt

- Alle meine Entchen.
- Schwimmen auf dem See.
- Falsche Veranstaltung!

2

Zweiter Punkt

- Völlig losgelöst...
- von der Erde...

3

Surprise!

- Hier kommt dann halt noch ein dritter Punkt.
- hehe

4

Vierter Punkt

- Punkt 4.
- Sie verstehen das Prinzip

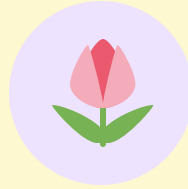

5

Fünfter Punkt

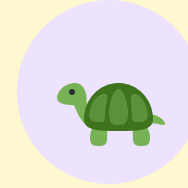

- Danke.
- Tschüss.

Es soll funktional sein.

Es soll schön sein.

Es soll langfristig sein.

2. "Schön"

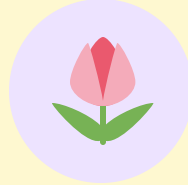

- Gute Farben & Fonts
- Hirnfreundliche Inhaltsgestaltung, z.B. durch eingeblendete Gliederung, Fortschrittsanzeige etc.
- Fokus lenken ohne "Raubtier-Fütterung-Mentalität"
- Barrierefreies PDF

Problem:

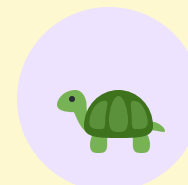

"**Design**" bezieht sich oft auf farbliche Gestaltung, nur eingeschränkt auf Layout

Es soll funktional sein.

Es soll schön sein.

Es soll langfristig sein.

3. "Langfristig"

- Markdown-basiert
- Aktiv entwickelte Software, Open Source
- Integration in bestehende Systeme, egal ob Editor oder Literaturverwaltung

Dafür gibt es verschiedene Möglichkeiten

MRMCD 2026

1. Wann hast du zuletzt eine Grenze überschritten – und warum?

Quelle: revealjs

reveal.js

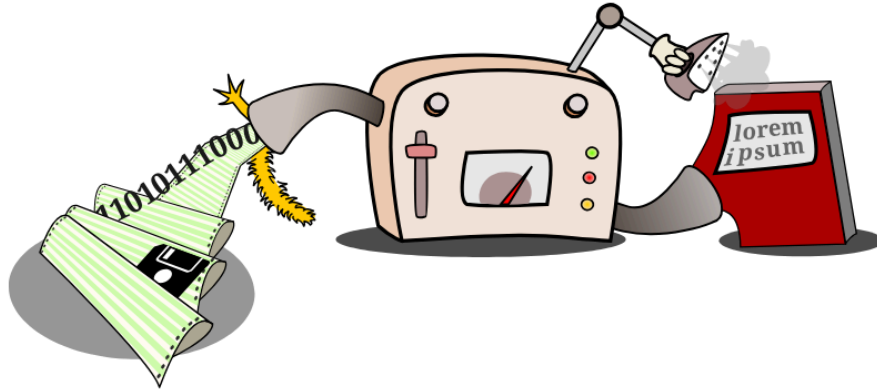

Stärken

- in Blog / Website etc. einbindbar
- kreativer Einsatz

Schwächen

- Ist halt browserbasiert und Browser haben ... Interpretationsspielräume.
- PDF als "Ablage-Format" funktioniert eingeschränkt.

Pandoc a universal document converter

[Donate](#)[Sponsor](#)[Please help Ukraine!](#)[About](#)[Installing](#)[Demos](#)[▼ Documentation](#)[Help](#)[Extras](#)[Releases](#) [Search](#)

If you need to convert files from one markup format into another, pandoc is your swiss-army knife. Pandoc can convert between the following formats:

(← = conversion from; → = conversion to; ↔ = conversion from and to)

Lightweight markup formats

- ↔ [Markdown](#) (including [CommonMark](#) and [GitHub-flavored Markdown](#))
- ↔ [reStructuredText](#)
- ↔ [AsciiDoc](#)

Word processor formats

- ↔ Microsoft Word [docx](#)
- ↔ Rich Text Format [RTF](#)
- ↔ OpenOffice/LibreOffice [ODT](#)

Interactive notebook formats

[Quelle: pandoc.org](#)

pandoc – Wie funktioniert es?

- reveal.js: `pandoc -t revealjs -s example.md -o example.html --self-contained`
- LaTeX beamer: `pandoc -t beamer example.md -o example.pdf`

pandoc

Stärken

- Schlicht Markdown-basiert
- Bandbreite an Formaten:
 - LaTeX Beamer
 - ↔ Microsoft PowerPoint
 - Slidy
 - reveal.js
 - Slideous
 - S5
 - DZSlides

Schwächen

- viele Output-Formate sind veraltet
- sehr abhängig von Templates (reveal.js, LaTeX beamer...)

Beamer – A L^AT_EX class for producing presentations and slides

The beamer L^AT_EX class can be used for producing slides. The class works in both PostScript and direct PDF output modes, using the [pgf](#) graphics system for visual effects.

Content is created in the frame environment, and each frame can be made up of a number of slides using a simple notation for specifying material to appear on each slide within a frame. Short versions of title, authors, institute can also be specified as optional parameters. Whole frame graphics are supported by plain frames. The class supports figure and table environments, transparency effects, varying slide transitions and animations. Beamer also provides compatibility with other packages like [prosper](#).

The package now incorporates the functionality of the former `translator` package, which is used for customising the package for use in other language environments.

Beamer depends on the following other packages: [atbegshi](#), [etoolbox](#), [hyperref](#), [ifpdf](#), [pgf](#), and [translator](#).

```
\begin{frame}
\frametitle{There Is No Largest Prime Number}
\framesubtitle{The proof uses \textit{reductio ad absurdum}.}
\begin{theorem}
  There is no largest prime number.
\end{theorem}
\begin{proof}
  \begin{enumerate}
\item<1> alert!> Suppose  $p$  were the largest prime number.
\item<2> Let  $q$  be the product of the first  $p$  numbers.
\item<3> Then  $q+1$  is not divisible by any of them.
\item<1> But  $q+1$  is greater than  $p$ , thus divisible by some prime
number not in the first  $p$  numbers. \qedhere
\end{enumerate}
\end{proof}
\end{frame}
```

Announcements

2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 | 2026

 2026-08-21 CTAN update: beamer

16 / 34

LaTeX (beamer)

Stärken

- Alt & ehrwürdig (= gut durchdacht)
- ziemlich viele Templates (aber wenig gute)
 - Scouts Beamer Theme
 - Wildcat Beamer Theme
 - Gotham Beamer Theme
 - Universidade Federal de Goias / UFGTeX
- Github-Listen, z.B.
<https://github.com/martinbjeldbak/ultimate-beamer-theme-list>

Schwächen

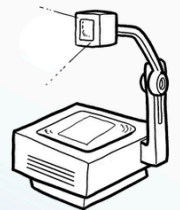

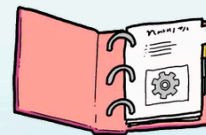

- Das eigene Denken muss hinterherkommen: steile Lernkurve.
- Eigenes Engagement zwingend nötig – wenn man die Defaults nicht ganz so toll findet.

The new foundation for documents

Limitless power to write, create, and automate anything that you can fit on a page.

Typst – Touying

touying 0.7.4

A powerful package for creating presentation slides.

☆ Featured Package

Touying (投影 in Chinese, /tóuyǐng/, meaning projection) is a user-friendly, powerful, and efficient package for creating presentation slides in **Typst**.

If you like it, consider [giving a star](#) 🌟 on [GitHub](#). Touying is a community-driven project — feel free to suggest ideas and contribute!

[universe](#) 0.7.4
 [docs](#)
[book](#)
[Ask DeepWiki](#)
[Ask Zread](#)
[demo](#)
[gallery](#)
[license](#) MIT
 [release](#) v0.7.4
 [Stars](#) 2.3k
 [themes](#) 6

Why Touying?

- **Beautiful themes** — [built-in themes](#) like Simple, Metropolis, Dewdrop, University, Aqua, Stargazer and [diverse themes on Typst Universe](#)
- **Fast** — Typst compiles in milliseconds. Live previews update as you type, giving you the instant feedback.
- **Rich animations** — `#pause`, `#meanwhile`, math equation animations, CeTZ & Fletcher support
- **Heading-based slides** — write presentations like a document, no boilerplate
- **Speaker notes** — dual-screen support via tools like PowerPoint, HTML or pypress
- **Export** — Built-in PDF export, PPTX and HTML via [touying-exporter](#)
- **Correct bookmarks** — proper PDF outline and page numbers out of the box

Documents & Help

- [Full documentation and references](#) (English & Chinese)
- [Ask DeepWiki](#) or [Ask Zread](#) for AI-assisted help
- [Gallery](#) — slides made by the community
- [Universe](#) — Diverse touying themes on Typst Universe
- [Share slides instantly on GitHub](#) with `gistd` or `export` slides to PPTX and HTML formats and show presentation [online](#).

Quick Start

Make sure you have [Typst](#) installed, or use the [Web App](#) / [Tinymist for VS Code](#).

```
#import "@preview/touying:0.7.4": *
#import themes.simple: *
```

How to add

Copy this into your project and use the import as **touying**

```
#import "@preview/touying:0.7.4" 
```

Check the docs for [more information on how to import packages](#).

```

Typst

Stärken

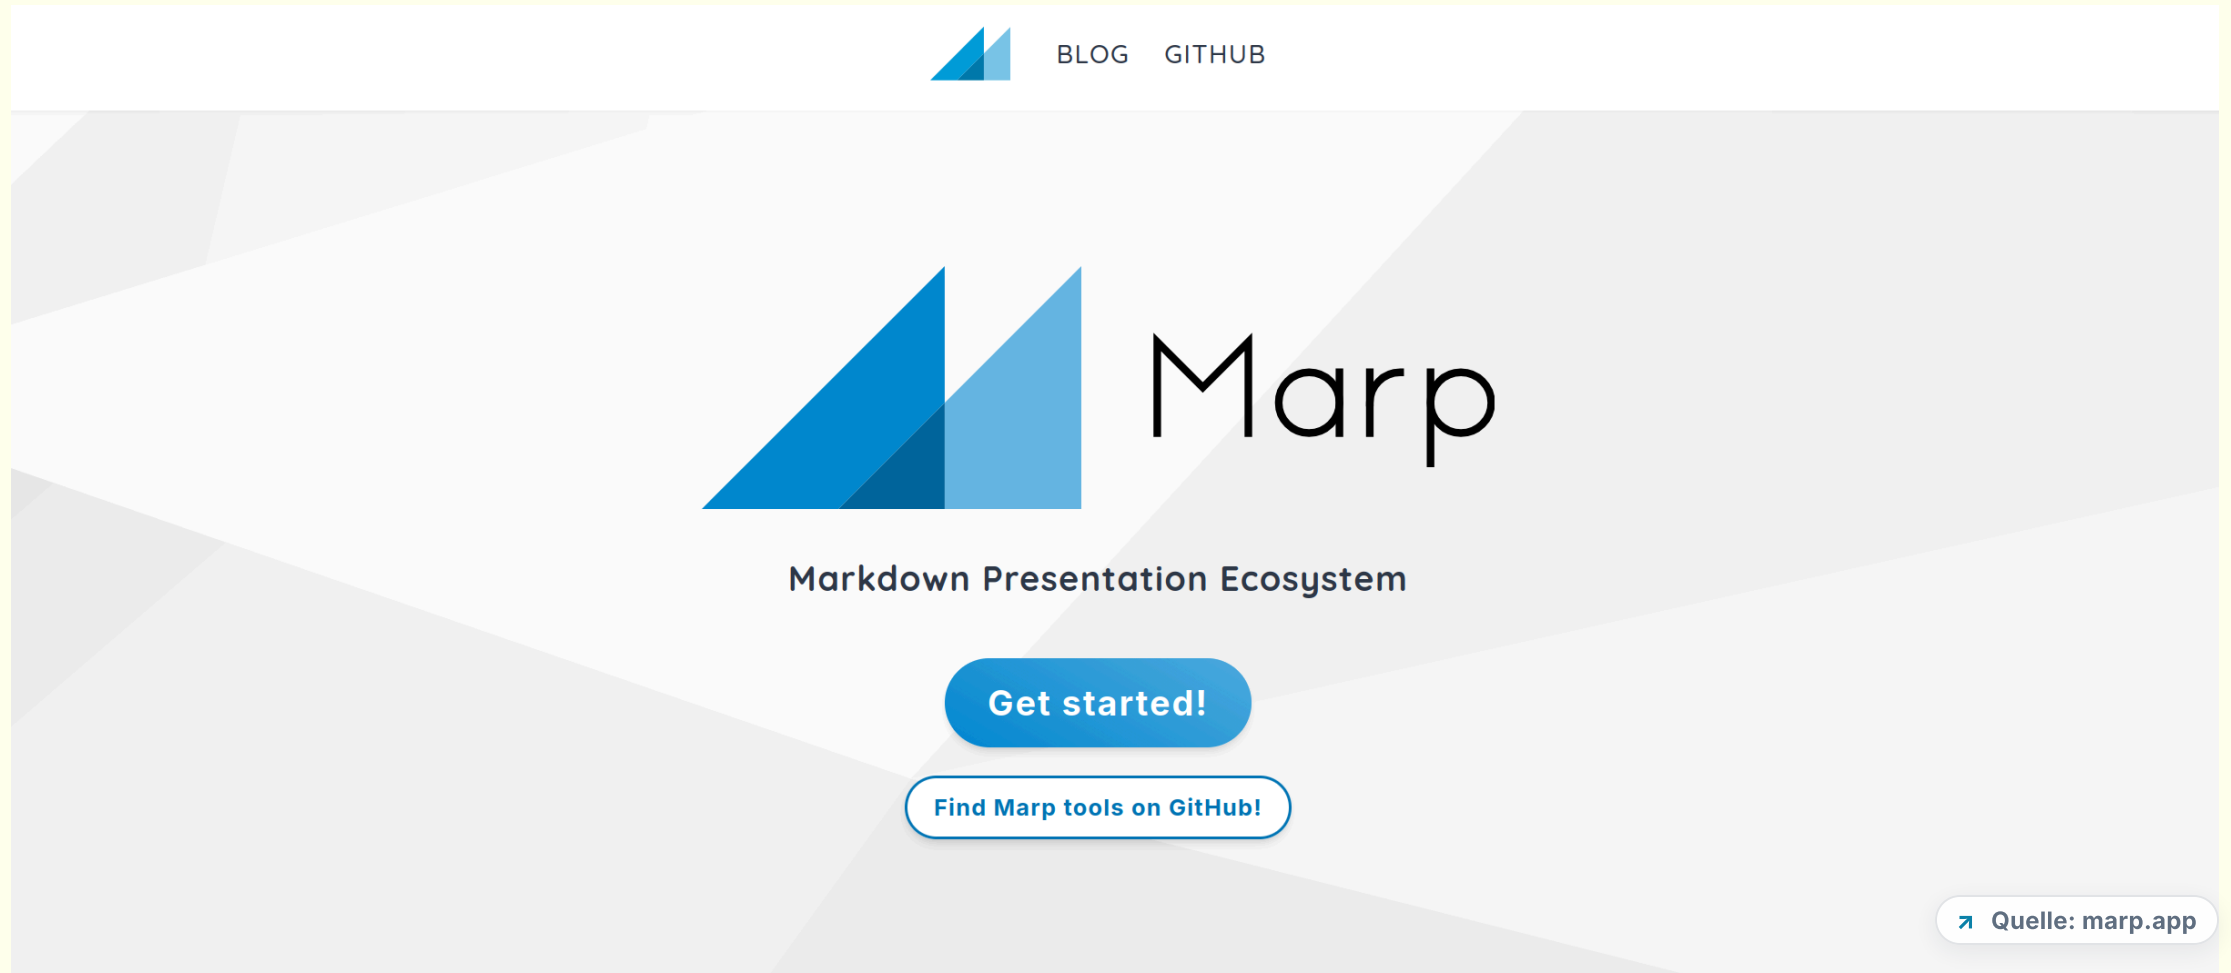

- Gut für visuell orientierte Slides
- schön hierarchisch gedacht
- Export in statische "Handout"-Slides und solche mit fragments direkt mitgedacht

Schwächen

- eigenes `.typ`-Format; klassisches `.md` zwar möglich – aber dann fehlen die Vorteile des eigenen Formats
- Lernkurve existent, aber fühlt sich lohnenswert an

Marp

(Die Grundlage für diese Präsentation.)

Marp: Wie funktioniert es?

```
marp slides.md --theme style.css --html --allow-local-files
```

```
marp slides.md --theme style.css --pdf --allow-local-files
```

Marp: flotter Einstieg, begrenztes Ökosystem

Stärken

- Schlicht Markdown-basiert
- Design über CSS / HTML
- Integration in VSCode, WYSIWYG-nah

Schwächen

- HTML/CSS-"Quick fixes" im Layout
→ Chaos

Der Teufel im Detail

- "fragmented" in Listen möglich – aber nur für den HTML-Export, PDF rendert immer alles
-  als Aufzählungspunkt für fragments;
-  für Listen ohne fragments

Zwischenfazit

**Ziemlich fragmentiert,
diese ganzen
Möglichkeiten**

Überblick der fortbestehenden Probleme 🙄

- LaTeX-Default hässlich & ich keine Designerin
- Generell ist viel "Design" v.a. Farben & Fonts, Layouts fehlen mir – insbesondere interessante, die die Köpfe im Publikum bei der Stange halten
- Typst ist mir zu viel Extra-Format, dafür, dass ich das gerne langfristig nutzen würde

Let me introduce you:

Quarto

Quarto

bringt alles zusammen, was man sich vorstellen kann

Welcome to Quarto

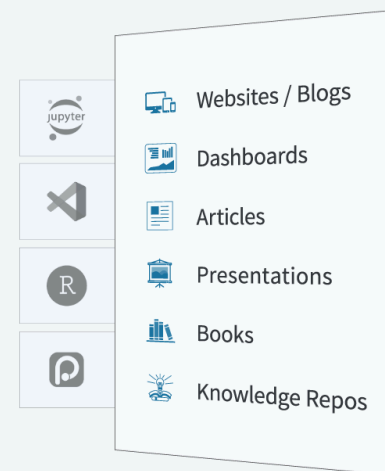

An open-source scientific and technical publishing system

- Author using [Jupyter](#) notebooks or with plain text markdown in your favorite editor.
- Create dynamic content with [Python](#), [R](#), [Julia](#), and [Observable](#).
- Publish reproducible, production quality articles, presentations, dashboards, websites, blogs, and books in HTML, PDF, MS Word, ePub, and more.
- Share knowledge and insights organization-wide by publishing to [Posit Connect](#), [Confluence](#), or other publishing systems.
- Write using [Pandoc](#) markdown, including equations, citations, crossrefs, figure panels, callouts, advanced layout, and more.

Analyze. Share. Reproduce. You have a story to tell with data—tell it with Quarto.

Get Started

Guide

Hello, Quarto

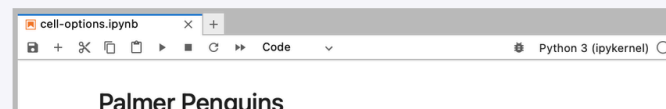

Python

R

Julia

Observable

Combine Jupyter notebooks with flexible options to produce production quality output in a wide variety of formats. Author using traditional notebook UIs or with a plain text markdown representation of notebooks.
